The first of the two papers in this section is by Dr. J. H. R. Taylor, who discusses the

problem of the existence of a solution of the equation $y'' + p(x)y' + q(x)y = r(x)$

in the case where $p(x)$ and $q(x)$ are continuous functions of x and $r(x)$ is a

continuous function of x which is not identically zero. The second paper is by

Dr. J. H. R. Taylor, who discusses the problem of the existence of a solution of the

equation $y'' + p(x)y' + q(x)y = r(x)$ in the case where $p(x)$ and $q(x)$ are

continuous functions of x and $r(x)$ is a continuous function of x which is not

identically zero. The third paper is by Dr. J. H. R. Taylor, who discusses the

problem of the existence of a solution of the equation $y'' + p(x)y' + q(x)y = r(x)$

in the case where $p(x)$ and $q(x)$ are continuous functions of x and $r(x)$ is a

continuous function of x which is not identically zero. The fourth paper is by

Dr. J. H. R. Taylor, who discusses the problem of the existence of a solution of the

equation $y'' + p(x)y' + q(x)y = r(x)$ in the case where $p(x)$ and $q(x)$ are

continuous functions of x and $r(x)$ is a continuous function of x which is not

identically zero. The fifth paper is by Dr. J. H. R. Taylor, who discusses the

problem of the existence of a solution of the equation $y'' + p(x)y' + q(x)y = r(x)$

in the case where $p(x)$ and $q(x)$ are continuous functions of x and $r(x)$ is a

continuous function of x which is not identically zero. The sixth paper is by

Dr. J. H. R. Taylor, who discusses the problem of the existence of a solution of the

equation $y'' + p(x)y' + q(x)y = r(x)$ in the case where $p(x)$ and $q(x)$ are

continuous functions of x and $r(x)$ is a continuous function of x which is not

identically zero. The seventh paper is by Dr. J. H. R. Taylor, who discusses the

problem of the existence of a solution of the equation $y'' + p(x)y' + q(x)y = r(x)$

in the case where $p(x)$ and $q(x)$ are continuous functions of x and $r(x)$ is a

continuous function of x which is not identically zero. The eighth paper is by

Dr. J. H. R. Taylor, who discusses the problem of the existence of a solution of the

equation $y'' + p(x)y' + q(x)y = r(x)$ in the case where $p(x)$ and $q(x)$ are
